# SCIENTIFIC COMMITTEE ORGANIZER

Adriano Piattelli, Ugo Covani and Eitan Mijiritsky

## INTRODUCTION

For several years, it is held alternately in Israel and Italy a joint meeting between professionals and researchers from the two countries, a meeting that aims to share the evolutions of knowledge in a field that deeply impacts dental treatment plans and has been a real revolution in the in the last thirty years.

Bilateral meetings are important for the purpose of sharing information and skills and for technology transfer in order to increase capacities and performances in this area. The Congress of 2019 will deal in particular with these topics: biology, technologic innovations and progressive informatization about the implant-prosthetic discipline.

UGO COVANI

A handwritten signature in black ink, appearing to read 'Ugo Covani', with a horizontal line underneath.

## GRAND HOTEL PRINCIPE DI PIEMONTE

The Grand Hotel Principe di Piemonte in Viareggio, historic hotel born in the twenties of the twentieth century, has been created to excite, designed to amaze and built to enchant the guests.

Ideal venue for meetings, the Grand Hotel welcomes its guests in an atmosphere that is rich in history and charm, without neglecting the most modern equipment.

Different areas, halls and rooms bring us back in time thanks to the conservative restoration carried out in 2004 which allowed to restore the ancient splendor. The various styles of its rooms tell a journey through the historical periods: international, belle époque, colonial, empire, ending with the modernity of the attic overlooking the heated thermal pool, which will be available to guests during the event.

The aesthetics and refinement of furnishings and rooms are always at the service of functionality, to ensure a pleasant and relaxing stay from every point of view.
